Shield

Learn to spot online scams, one situation at a time.

Ghaida Alharbi

Scams hide in everyday messages

Fake job offers

Pay a fee to get hired.

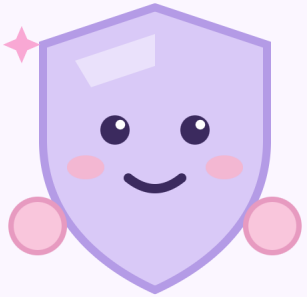

Phishing and impersonation

Urgent texts, fake banks, fake bosses.

Image-based blackmail

Pressure to send private photos.

Women and girls are often targeted, yet most security advice is long and easy to ignore.

Our solution: learn by playing

1

Read a real situation

Texts, calls, emails, QR codes.

2

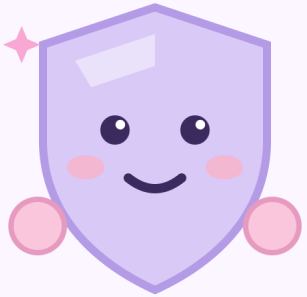

Choose Safe or Risky

Our mascot claps or gets angry.

3

Learn the red flags

A clear explanation every time.

Three levels that grow with you

Easy

Classic scams with obvious warning signs.

Medium

Impersonation, fake pop-ups, everyday habits.

Hard

Lookalike domains, fake QR codes, safe things that look scary. 20-second timer.

Why it matters

Free and private

No accounts. Nothing leaves the browser.

Works on any phone

Nothing to install. Light and dark mode.

Beginner friendly

Five minutes to build safer habits.

Next: Arabic and more languages, a bigger scenario bank, and a teacher and parent mode.
